FUND COMMENTARY

The Fund grew by 6.54% in May vs. the 1.15% growth in the NGX 30 index. We attribute this improvement to the recent uptrend in the banking sector with increases in GTCO(+22.32%), ACCESSCORP(+2.08%) and ZENITH(+2.80%). We also saw increases in DANGSUGAR(+20.82%), MTNN(+9.52%), SEPLAT(+3.60%) and NESTLE(+13.69%) which contributed positively to the Fund's performance. We were able to increase our holdings in some strong names under our coverage leveraging the attractive entry points presented during the month.

Money Market Fund

Unless otherwise stated, figures are as of May 31, 2024

FUND OVERVIEW

The Fund aims to preserve investors' capital and provide them with a steady stream of income. This will be achieved through investments in a select portfolio of quality money market securities and short-term government securities with tenors of no more than 364 days, and a maximum weighted average maturity of 90 days.

FUND COMMENTARY

The Fund's net yield closed at 16.26% in April 2024, up 81bps over the month. The net yield slightly underperformed its benchmark as the increase in NTB closing rates outpaced repricing options. With the expectation of a further rise in money market yields, we remain at the shorter end of the curve in the coming months. The fund's weighted average maturity closed the month at 83 days, slightly below the 90 days at end of April.
